

Managing Organic Resources in a Changing Environment

18th International RAMIRAN Conference

14-17 September 2020

Cambridge UK

RAMIRAN "Recycling of Agricultural, Municipal and Industrial Residues in Agriculture Network" is a research and expertise network set up over 25 years ago to improve nutrient utilisation and minimise the environmental impact from livestock manure and other organic material use in agricultural systems. This conference was last held in 2017 and attracts up to 250 delegates from across Europe and further afield. RAMIRAN 2020 will be organised by ADAS, Rothamsted Research and Bangor University and held at the University of Cambridge in Eastern England, UK.

The conference will focus on developing strategies to maximise the efficiency of organic materials against a background of changing regulation, policy and market forces, as well as increasing pressure on the environment, soil quality and food production. Oral and poster presentations will be invited to cover the full spectrum of research, from theory to implementation and adoption by stakeholders. The conference will include sessions on -

- Policy and regulation
- Nutrient utilisation
- Soil quality
- Clean air and water
- Treatment and processing technologies
- Promoting best practice

Registration and abstract submission will open on 1st September 2019

The website will be updated to provide you with more information on the conference.
